

SKIN SPA

MEDISPA

ACNE | SKIN | ANTI-AGEING EXPERTS

WELCOME TO SKIN SPA®

Skin Spa® Medispa was first established in 2005 and just like your skin, has undergone some changes since that time.

Our team of Senior Therapists are hand-picked. We do not advertise for staff. They are selected based upon their reputation, qualifications, knowledge and customer first commitment.

Skin Spa® continually invests into treatment training, product knowledge from *Ultraderm* and *Esthemax™* and new patented technology from the USA, Korea and Germany.

We look forward to delivering relevant, targeted guidance on your skin type or skin challenges. Allow us to guide you on our journey and please guide us on what you would like to achieve.

We are here to listen and we are here to help!

Quality Technology | Quality Service | Quality Therapists

ACNE TREATMENTS*

Face (50 mins)	\$115
Chest or Back (50-60 mins)	\$125
+ Multi-effect LED Treatment option	\$48
+ Ultraderm Peel option	\$33

INCLUDES + Complimentary Anti-bacterial Treatment

Early intervention always prevents bigger problems, later. Our experience over thousands of Acne treatments has indicated the longer treatment is avoided, the longer it takes and more difficult it is to correct, and, the more expensive it is to overcome. Acne is a stubborn condition and requires commitment to control. It will take time, regardless of your chosen correction preference.

In most cases, improved dietary intake, cleansing and hygiene alone will not be enough. Firstly, the infection will require controlling through technology, extractions and anti-bacterial treatments. Secondly, we will work to a treatment plan keeping you on track, to reduce the infection spreading and to commence the healing process. We offer twice-weekly, complimentary anti-bacterial treatments to assist in achieving accelerated results.

Visit skinspa.com.au/Acne for details.

ultraderm

*Skin types and results differ from person to person and accelerated results can be achieved with our technology and technique. Please understand little is achieved without your commitment to homecare, a supportive diet, hygiene and frequent complimentary, anti-bacterial treatments. Unavoidable, slight redness or scabbing may occur in treated areas temporarily. Treatments do not require the use of drugs, however you are free to seek medical support at any time. Cancellation policy applies.

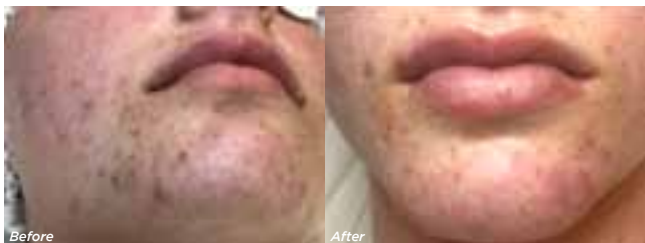

BLACKHEAD EXTRACTION FACIAL*

Face (50 mins)	\$134
Chest or Back (50-60 mins)	\$145
+ Multi-effect LED Treatment option	\$48
+ <i>Ultraderm</i> Professional Peel option	\$33

INCLUDES + Complimentary Anti-bacterial Treatment

Blackheads or comedones are unsightly! Unfortunately, leaving them in tact, they will continue to grow and stretch your pores, becoming larger and more visible. They don't go away by themselves and require technology and commercial grade dermal cleansing to remove. Early intervention is key to a faster, less expensive result!

Blackheads are particularly common and there is no reason whatsoever to feel uneasy about us removing them for you. During our Blackhead Extraction Treatment, we employ combinations of instruments, electronic technology and peels to achieve the desired result. If you have them broadly across your face or other bodily areas, it may take 2-3 sessions to remove them all; in other cases, maybe just 1-2 sessions will be required.

Visit skinspa.com.au for details.

ultraderm

*Please understand that unavoidable, slight redness may occur in treated areas temporarily. We suggest that if you have approaching social or work events, that you plan your appointment well in advance. Cancellation policy applies.

MEDI-FACIALS*

Advanced Anti-Ageing Treatment (75 mins)	\$165
+ Polychromatic LED option	\$48
+ Ultraderm Professional Peel option	\$33

Double cleanse with steam and an exfoliation; this then prepares your skin to receive collagen-stimulating, Neon high frequency technology. Hydration and nourishment follow, with the latest *Ultraderm* technologies such as Apple Stem Cell serum and Vitamin serums applied to stimulate collagen renewal and cell restoration.

A skin tightening facial massage and rebalancing mask will deliver a noticeable outcome for your skin concerns, not to mention renewed confidence in your appearance.

Results

- ✓ Supple, hydrated and clean, radiant skin
- ✓ Blackhead and clogged pore removal
- ✓ Stimulated production of collagen and elastin, firming the skin
- ✓ Targeted, accelerated cellular renewal and repair
- ✓ Smoothing of fine lines and wrinkles
- ✓ Detoxification of skin from pollutants, oils, dirt and make up

<i>Esthemax</i>TM Thermal Collagen Mask (80 mins)	\$195
---	--------------

Revolutionary treatment with immediate visible results! *Esthemax*TM active ingredients are deeply absorbed in a 48-52°C thermal reaction. The special heat treatment raises the skin's temperature for rapid and effective absorption of active ingredients.

Client feedback has indicated that it is the ideal treatment – without downtime – to have prior to an important event, where plumpness and fullness of the skin lessens signs of visible ageing!

Visit skinspa.com.au for details.

ultraderm **esthemax**

*For superior skin results, a Medi-Facial treatment is ideal as a first step towards a Microdermabrasion Facial (Step 2), then a Re:generateTM Facial (Step 3) and/or EndyMedTM Skin Tightening Treatment (Step 4). Your skin requires thorough cleansing before complimenting treatments are applied, to avoid bacterial reaction and best results.

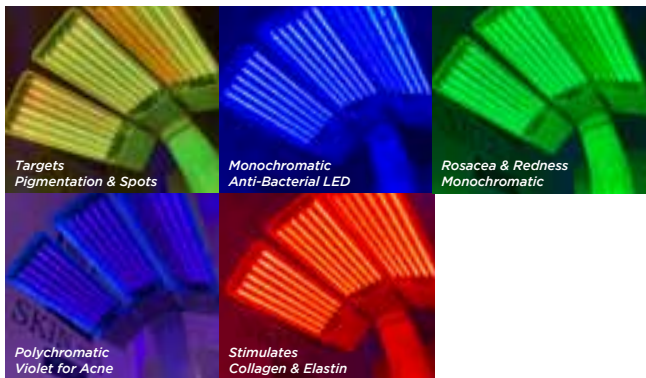

MEDI-FACIALS* (continued)

Cleanse & Preparation Treatment (55 mins)	\$110
+ Polychromatic LED option	\$48
+ <i>Ultraderm</i> Professional Peel option	\$33
+ <i>Esthemax</i>TM Hydro-Jelly Mask	\$39

Comprehensive cleansing will ensure you experience visible results. An *Ultraderm* vitamin serum is applied to drive collagen renewal and cell restoration. Discussion and analysis will identify areas that need targeting.

Results

- ✓ Supple, hydrated and cleansed skin with a noticeable, more consistent tone
- ✓ Cellular renewal and enhanced clarity
- ✓ Mild detoxification of skin from pollutants, airborne dirt and make up
- ✓ Ideal preparation for further skin improvement treatments

Visit skinspa.com.au for details.

ultraderm **esthemax**

*For superior skin results, a Medi-Facial treatment is ideal as a first step towards a Microdermabrasion Facial (Step 2), then a *Rejuvenate*TM Facial (Step 3) and/or *EndyMed*TM Skin Tightening Treatment (Step 4). Your skin requires thorough cleansing before complementing treatments are applied, to avoid bacterial reaction and best results.

MICRODERMABRASION*

Clairderm™ Medical Technology

Advanced Microdermabrasion - Face (60 mins) **\$170**

Advanced Microdermabrasion - Face, Neck & Décolletage (80 mins) **\$199**

Advanced Microdermabrasion - Back (70 mins) **\$189**

Microdermabrasion is a well known modality used in medical circles for the deep exfoliation of the skin. Using pure silica crystals, your skin is deeply exfoliated to stimulate collagen and cell renewal. Gentle suction removes dead skin cells, the crystals unclog pores, resurfacing and repolishing surface dermal layers reducing the appearance of fine lines.

Includes

- ✓ Polychromatic LED to destroy bacteria and calm the skin
- ✓ *Ultraderm* Peel to suit your particular skin type
- ✓ *Ultraderm* Apple stem cell serum and vitamin serums
- ✓ *Ultraderm* Hydrating & Repairing recovery mask

Results

- ✓ Removes dead skin cells, stimulating collagen and cell renewal, unclogs pores, resurfaces and polishes surface dermal layers
- ✓ Promotes lymphatic drainage and toxin removal
- ✓ Treats pigmentation/sun damage
- ✓ Treats fine lines and wrinkles, Acne scarring, open pores and oily skin

Microdermabrasion - Face (45 mins) **\$105**

Includes

- ✓ *Ultraderm* Vitamin nourishment serum
- ✓ *Ultraderm* Moisturiser or 30+ SPF sunblock

Results

- ✓ Removes dead skin cells, stimulating collagen and cell renewal, resurfaces and polishing surface dermal layers
- ✓ Treats fine lines and wrinkles, Acne scarring, open pores and oily skin

Visit skinspa.com.au for details.

*Ideally performed 7-10 days after your Step 1 Medi-Facial cleanse. Skin must be cleansed thoroughly first with a Medi-Facial to prevent the spread of bacteria causing breakouts and adverse reactions. A Re:zerate™ Facial (Step 3) and/or EndyMed™ Skin Tightening Facial (Step 4) are the best next steps in your skin treatment journey.

REGENERATE™ NANO-FACIAL*

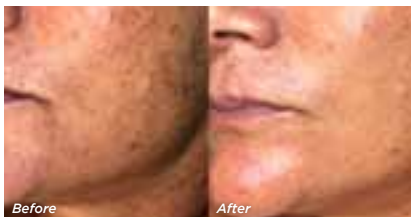

Patented Medical Technology from the USA

Face (60 mins)	\$195
Face, Neck & Décolletage (100 mins)	\$385
+ Ultraderm Professional Peel option	\$33

Skin Spa® is the first salon in Australia to have *Rezenerate™* – the latest Nano technology phenomenon direct from the USA. Used for delivering superior skin results in previously inaccessible areas of the face such as under the eyes, eyelids and lips – without discomfort.

Results

- ✓ Targets fine lines and promotes hydration
- ✓ Reduces blemishes and pigmentation
- ✓ Reduces Acne scarring and pitted skin
- ✓ Stimulates collagen with longer lasting effect
- ✓ Drives vitamin serums into the dermal layer, nourishing your skin and providing sustainable, longer lasting results
- ✓ Safe, sterile, largely painless and effective
- ✓ Works directly on problem areas under/around the eyes and on the lips
- ✓ No discomfort or down time – return to work the same day

Visit skinspa.com.au for details.

*Your skin needs to be cleaned first. *Rezenerate™* cannot be performed on dirty, congested skin, as bacteria will spread, causing a high likelihood of a breakout. The best results are achieved after an initial cleanse facial, then a microdermabrasion treatment which removes the debris, deeper congestion and surface layers of dead skin cells.

SKIN TIGHTENING TREATMENT

EndyMed® with 3DEEP® Patented Global Medical Technology

3 Treatment Package

POA

6 Treatment Package

POA

When it comes to treating saggy skin, often, the only procedure worth considering is a medical grade radio frequency skin tightening treatment. Delivered by our senior specialists, you will experience rapid results. Radio frequency raises the temperature of the skin and blood within the epidermis to around 42°C. This stimulates collagen production, delivering sustained results.

Results

- ✓ Tighter, firmer skin with noticeably less 'sag' which improves in time
- ✓ Stimulation of collagen and elastin that improves elasticity/firmness
- ✓ Tighten prominent areas around the eyes, jowls and mouth.
- ✓ Reduced fine lines, troughs and signs of ageing

Frequent treatments deliver a compounding effect as layers of collagen build. Ask us for a 3 or 6 package to suit your particular skin. Pricing works best for the customer in terms of zones - no need to pay for a full face treatment when you may only require your eyes to be treated. Ask your Skin Spa® therapist for details on your particular skin concerns.

Visit skinspa.com.au for details.

intraLUMEN **ENDYMED**
RF SKIN TIGHTENING

**EndyMed™ technology is best performed on clean, nourished & hydrated skin. Treatment is weekly for 3 or 6 sessions - with 6 treatments delivering a longer lasting, more sustainable result. Results can vary depending upon treatment area, individuals and maintenance of the treated area. Results typically take 1-3 months to procure. This treatment will not remove wrinkles forever, but will flatten out peaks and troughs. A slight redness will result that will dissipate in 30-40 minutes.*

PHOTO-REJUVENATION*

AW3® Technology from the UK

Face & Neck (45 mins)	\$169
Face, Neck & Décolletage (60 mins)	\$225
Back of Hands	\$85

Photo-rejuvenation targets pigmentation, fine lines and uneven skin tone. Non-invasive by nature, it uses AW3® Intense Pulsed Light (IPL) to deliver remarkable results on problematic areas of the skin, with the most visible benefit occurring after 3 or so treatments on clean skin.

Results

- ✓ Treats sun damaged skin and spotted pigmentation
- ✓ Treats fine lines and crepe-like skin conditions
- ✓ Treats capillaries, redness and Rosacea
- ✓ Treats freckles and blotchy complexion
- ✓ Treats Acne scarring, large pores and ageing

Visit skinspa.com.au for details.

intra^{derm} AW3

**Not suited to darker skin types, sun-exposed skin or tanning solution-treated skin. Photo-rejuvenation is an effective treatment modality. In some areas, it does & can feel like an elastic band snapping your skin. Whilst largely tolerable, its effects may be more pronounced in some areas more than others. This is due to high intensity light being delivered over a small area. No down time typically can be expected, although slight redness of the skin may occur temporarily.*

COLLAGEN INDUCTION FACIALS*

Dermal Needling with Patented Korean / German Technology

Clinical Micro Needling (75 mins)

\$245

Micro-needling is a more intensive treatment administered by our senior therapists. We stimulate the skin's regenerative response via a medical grade dermal pen, allowing deeper penetration of active nourishing ingredient, triggering growth signals to skin cells which over time, promotes collagen and elastin production. Treatment includes application of LED technology to aid in the repair of the skin, whilst also delivering anti-bacterial/collagen stimulating treatment.

Results

- ✓ Treats open, large pores (strawberry textured noses, cheeks and chin)
- ✓ Treats fine lines and the ageing process
- ✓ Scar reduction, particularly Acne related and chicken pox scars
- ✓ Evens skin tone and pigmentation

Collagen induction treatment pen

Visit skinspa.com.au for details.

intraderm

**Clinical micro-needling is an aggressive but highly-effective treatment, which comes with some down time and subsequent peeling of skin. We recommend it only for those clients that have ambitious goals with their skin. Scabbing and the shedding of skin can be expected. It may be advisable to purchase at a chemist, a suitable numbing cream and apply 45 minutes in advance of your treatment to the treated area. Ideally performed on a Friday on suitably prepared skin. We recommend that you do not plan or attend social or work events immediately after commencing this treatment modality. Speak to your Skin Spa® therapist on your skin's suitability for this treatment.*

SKIN & BODY CONCERNS

Capillary, Milia, Skin Tag & Angioma removal

Permanent Removal of Capillaries/Thread Veins

Approx **\$70[^]**

We remove capillaries in minutes, using electrolysis*. Small scabs may appear after the treatment and should be allowed to fall off naturally.

Permanent Removal of Milia

POA

Milia are white, round raised fatty lumps, usually near cheekbones, eyes and the jawline. Caused by a build-up of keratin, oils and skin cells that are trapped below the skin, they can be stubborn to remove. Milia can be large in size and low in number, or small and multiple in number. Every case is different, so a consultation is necessary. Following the procedure, small to tiny lesions may appear, which will fall off naturally.

Permanent Removal of Skin Tags

Approx **\$50-70[^]**

We target skin tags using diathermy* current. Several days later, the skin tag will form a crusty, small lesion and fall off.

Permanent Removal of Angioma (Cherry Spots)

Approx **\$70[^]**

Angioma are unsightly benign growths that can be removed painlessly, using electrolysis*, in just minutes.

Visit skinspa.com.au for details of removal procedures.

intraderm

*Electrolysis and diathermy can in some situations/locations of the body, provide an uncomfortable bee-like sting. It is advisable to apply numbing cream (from a chemist) 45 minutes in advance of your treatment. Always consult your doctor or GP prior, to ensure there is no possibility of cancer-related activity in the areas you wish to treat. *Per treatment, as a guide for 3 locations.

COSMETIC INJECTABLES

Dr Andrew Clark PhD MBBS (Hons) B.MedSci

Wrinkle Relaxers

POA

All treatments include free review and, under most circumstances, where extra units are required, these are given free of charge.

Treatment to Reduce Armpit Sweating

POA

For both armpits, our wrinkle relaxer treatments are scientifically proven to last more than 9 months in 90% of clients.

Dermal Fillers

POA

Soft fillers are suitable for under eyes, scar treatments and fine lines, especially fine lines around the mouth and forehead. Medium fillers are longer lasting, suitable for plump lips, deep folds and reshaping. Firmer fillers are longer lasting and suitable for natural looking rejuvenation, lift and enhancements of cheeks, temples and jawline. Collagen stimulating dermal fillers last 2-4 years, depending on the treatment.

About Dr Andrew Clark

One of the 'Ultimate 100 Global Aesthetic Leaders' of 2019, Dr. Andrew Clark is an internationally published scientific author and experienced medical doctor, now exclusively practicing cosmetic medicine. He is trained in the use of medical relaxers and has a PhD in the fields of skin and muscle biochemistry and physiology.

Visit discovermaw.com for details.

**The decision of which dermal filler to use should take into consideration your personal skin type, unique circumstances and desired results. Dr. Clark will discuss these factors with you during your consultation to help you decide on the most appropriate treatments and products. Often, for best results more than one product may be needed and treatments can be done on multiple occasions.*
